9974 **QUESTION ON NOTICE**

Ms Sandell to ask the Minister for Public Transport —

With reference to Melbourne Metro:

- (1) Which government authority will be responsible for ensuring the Melbourne Metro tracks, as well as current and future rolling stock, are mitigating for noise and vibration once the project is complete.
- (2) How will owners and occupiers of properties along the proposed Melbourne Metro be compensated should any damages to their property arise from the operation of the Melbourne Metro.
- (3) Will there be a government authority that will investigate and handle complaints and award compensation for any property damage that occurs as a direct result of the operation of Melbourne Metro, as has happened in similar projects such as Crossrail in the UK.
- (4) Will all property owners and occupiers along the proposed Melbourne Metro routes have their properties assessed to establish a baseline for any possible future damage before works start; if not, who decides which properties will be assessed and under what methodology and criteria.
- (5) Why is the Melbourne Metro Rail Authority (MMRA) using the more disruptive Tunnel Boring Machines (TBM) rather than a mined tunnel to construct Melbourne Metro tunnels underneath homes in North Melbourne and Kensington.
- (6) If the consortia chosen for the Melbourne Metro determines that the current proposed floating track technology cannot be delivered as part of the project, how will affected property owners and occupiers be

notified.

(7) If the current proposed floating track technology cannot be delivered as part of the project, will contractors be required to introduce similar or better technology to ensure vibration and noise during the operation of Melbourne Metro is minimised to protect property damage and adverse effects on human comfort.

(8) How will the Government ensure that the Melbourne Metro tunnels under North Melbourne do not cause any damage to property and amenity given they are relatively shallow compared to the current City Loop tunnels.
