

I have been a professional Fire Fighter for 38 years and currently stationed at Glen Waverley Fire Station. I support the Fire Services Reform due to increased population growth and increased urbanisation in many areas. These populated areas should have Full time 24 hr Fire cover for people's safety. I have experienced on occasions when responding to Fire Calls certain volunteer stations could not man their pumper on a day shift and also responding 1 person in a car to a Nursing Home as a back up appliance , I don't think a response like that is acceptable. Career Fire Firefighters also offer Emergency Medical Response with Ambulance Victoria, which has been of great value to the community.

Phil Constantinou

Leading Fire Fighter MFB
