

## Appendix 08

### Table Summary

Attached is a table, a quick snap shot of 'our world', one which provides the best examples of the shortfalls within the current system. It's not when we get support but its' if. And in what form will that support be? Will they be fully qualified and experienced to handle the intricacies of the incident or will they further compound a dangerous situation.

It is important to note that this by no means a complete list.
