Subject Fire Services Reform Submission

I would first like to ensure that the following submission is completely anonymous and that my name or any of my details will not be publicly published.

As a professional firefighter I fully support the currently proposed fire services reform. This reform will result in a better service delivered to Victorians and therefore result in a safer Victoria. It will not only give more Victorians coverage from professional firefighters but vastly improve the interoperability of emergency services across the state.

I also support the introduction of presumptive legislation as it will protect firefighters who risk their own health for the safety of the public. This sacrifice should be protected by legislation as the cancers that fall under the umbrella of the legislation have been proven to be directly linked to the work firefighters undertake.
