Written question:

Last year works at Sunshine College were ground to a halt because of an estimated \$5.5 million worth of asbestos removal. The government refused to provide additional funds until it made a commitment at the election. Does this budget ensure that where project costs are blown out by asbestos removal – schools will still receive the facilities that the government has promised them?

Answer:

The 2019-20 Budget allocated \$12.75 million to Sunshine College for the next stage of its major upgrade which includes previously deferred works due to the significant amount of asbestos found during demolition. This stage will include the Performing Arts Centre, Gymnasium, Year 7-8 Learning Building, carparks and other upgrades. This builds on the \$21.7 million already provided by the Government to the school.

6. Three Year Old Kinder - Infrastructure (BP4 P25)

Page of transcript:	N/A

Written question:

Where asbestos is located as part of works funded under this program, who is responsible for its removal and all costs associated? The Department, Local Government or the kindergarten?

Answer:

For capital works projects initiated and delivered by the Department of Education and Training, all asbestos identified within a capital works construction zone must be removed and the cost is to be funded from within the project budget.

Eligible applicants under the Children's Facilities Capital Program will continue to be responsible for the removal of contaminants, including asbestos, on project sites, and all costs associated.

7. Three Year Old Kinder - Delivery (BP3 PG 21)

Portfolio:	Education
Witness:	N/A
Committee member:	The Hon. Mr. Richard Riordan MP
Page of transcript:	N/A

Written question:

Are there enough teachers to deliver these programs? What is the plan for recruitment and is that different for rural and regional areas?

Answer:

We estimate that more than 4,000 additional kindergarten teachers and more than 2,000 additional early childhood educators will be needed as the program expands state-wide.

The \$92.4 million package of workforce initiatives in the Budget represents the first stage of investing in attracting, retaining and providing better professional support to kindergarten teachers and educators. It includes investment in additional scholarships and incentives to support more people to pursue careers in early childhood teaching, and encourage existing educators to upskill. To recognise the additional challenge of recruitment in regional and rural areas, incentive payments of up to \$9,000 will be available for early childhood teachers choosing to teach in the 2020 and 2021 roll-out areas. Early childhood teaching scholarship students will also be eligible to receive additional financial incentives to work in rural and regional areas upon graduating.

Under Commonwealth Government's schools funding model, how much money is Victoria entitled to from the loading for students with a disability?

Answer:

Commonwealth funding for Victorian Government schools, determined using the Schooling Resource Standard in the *Australian Education Act 2013*, is appropriated through the State budget annually and consolidated with State funding for government schools. The request for tender documents on government school cladding indicated that works would be conducted in September this year. Has a contract been signed? Who is doing the work? At what cost?

Contracts have been signed. The builders contracted to complete the works include Building Engineering Pty Ltd, Casello Pty Ltd, Duratec Australia Pty Ltd, Hansen Yuncken Pty Ltd and May Constructions Pty Ltd. \$10.5 million has been allocated to remove combustible cladding.

23. Cladding (BP3 PG 124)

Portfolio:	Education
Witness:	N/A
Committee member:	The Hon. Mr. Richard Riordan MP
Page of transcript:	N/A

Written question:

Why should this process take around 9 months (from RFT or longer depending on date of audit) when cladding was removed from the office of the Minister for Environment at 8 Nicholson Street promptly?

Answer:

Given the unique nature of cladding rectification work at each site, the Victorian School Building Authority (VSBA) has employed a contract management procurement approach with the successfully awarded service provider having responsibility for procuring and supervising all contracts for delivery of rectification works.

Once the project management contract was awarded, design development work commenced for each building and site (e.g. scoping the extent of works, specifying materials, integrating with adjacent structures and materials, etc.). Once this was completed, the packages of works could be tendered.

Significant planning to schedule site works has been done in consultation with the relevant schools, and this commenced once schools returned in Term 1, 2019. All tenders have been finalised.

24. Cladding (BP3 PG 124)

Page of transcript:	N/A

Relevant text:

With new materials being added to the banned list by the Victorian Building Authority, how many more schools are at risk with flammable cladding and is there a plan for the removal of these materials?

Answer:

There has been no change to the existing list of combustible cladding material which has been referenced on the Victorian Building Authority website 'Minister's Guideline MG-14'.

The VSBA's minimum standards for design which are set out in the Department's *Building Quality Standards Handbook* prohibit the use of combustible cladding on school buildings.

26. Number of classrooms Brunswick South West Primary School

Portfolio:	Education
Witness:	N/A
Committee member:	The Hon. Mr. Sam Hibbins MP
Page of transcript:	N/A

Written question:

There is \$4.1 million to Brunswick South West Primary School stage one construction. What arrangements are the state government making to restore sufficient number of classrooms available during and after the completion of stage one?

What is the government's timeframe for the completion of stage two?

Answer:

The Brunswick South West Primary School master plan has been developed to provide learning spaces that support the school in delivering 21st Century pedagogy. The school's master plan proposes the first stage of this transformation, featuring modern, flexible learning spaces that allow for collaborative and general learning, along with practical activities, consultation, small group work, reflection, presentation and performance. These spaces, together with the existing school facilities, are in line with the Department's area schedules to support a student population of the size at the school. The VSBA is working with the Brunswick South West Primary School and its School Council to ensure students have access to appropriate and sufficient temporary learning spaces both during and after the conclusion of the stage one works.

Further funding for capital works at the school will be subject to future State Budget processes.
