**Subject:** Gannawarra - Veolia Questions

Good Afternoon Justine,

In response to the Chair's question below I can provide the following answer.

*The CHAIR: ...are you able to check with Veolia, for example, and basically double-check where the product is going? You are saying paper is going to Visy and metal is going to Sims, but the interesting one, which I am really curious about, is that this stuff going to New South Wales has been obviously sorted to an acceptable level in accordance with the new China Sword policy, which is that you use clean pellets. **So are you able to verify from Veolia that these are the processes and that is where they end?***

This is the information provided to me by Velia.

Cardboard and Paper	Paper Mill Melbourne
Steel/Tin Cans	Scrap Metal Recyclers Australia
Aluminium Cans	Exported
Glass Bottles and Jars	OI Australia Melbourne
PET (Plastic #1)	On Shore NSW
HDPE (Plastic #2)	Greenpipe Moama, RPM Plastics
PP (Plastic #5)	Plastic Brokers Australia

Kind Regards

**Geoff Rollinson** | Director Infrastructure & Development | Gannawarra Shire Council
