

# PAEC Inquiry into vaping and tobacco controls

### Response to questions on notice – EPA Victoria.

EPA Victoria was asked to provide additional information to support questions taken on notice during the hearings on Monday July 15, 2024.

The inquiry panel requested additional information on:

- 1. The references to travel distance in time to e-waste facilities set up to support the e-waste ban from landfill.
- 2. The location of e-waste facilities, particularly those that took vapes.
- 3. What proportion of vaping products are disposed of in the correct way out of the overall product that comes into the state?

Below is information to address each of these questions.

#### The references to distance in time to e-waste facilities set up to support the e-waste ban from landfill

To support the e-waste ban to landfill, transfer stations across Victoria were funded to upgrade collection sites for e-waste. The location of the upgrades was to bring e-waste collection facilities to within 30 minutes of 98% of Victorians in regional areas.

Sustainability Victoria administered grants to 76 local government areas to support e-waste collection, the formal announcement of the drop-off network can be found at:

https://www.premier.vic.gov.au/recycling-more-e-waste-and-keeping-it-out-landfill

#### The location of e-waste facilities, particularly those that took vapes.

E-waste is defined broadly as anything with a plug or a battery. Due to the inclusion of a lithium-ion battery, vapes are generally considered a form of e-waste. Table 1 contains a list of transfer stations that accept e-waste from residents. E-waste collection is often made available without fee to local residents, however, some are known to charge fees at the gate for e-waste drop off.

Depending on the arrangements with the e-waste processing facility, some transfer stations may not be able to accept vapes. EPA Victoria does not hold data regarding the exclusion of vapes at resource recovery facilities or transfer stations.

The list of facilities does not include small scale battery drop off locations generally run by B-cycle for loose batteries. At the time of writing, B-cycle was unable to take embedded batteries such as those in

#### epa.vic.gov.au

Environment Protection Authority Victoria GPO Box 4395, Melbourne VIC 3001 1300 372 842

vapes as the stewardship arrangements did not extend beyond the major manufacturers of products using detachable batteries.

Each transfer station may alter service arrangements depending on availability. Recycling Victoria provides a map of facilities across the state, which can be found at the following web address Victoria's waste and resource recovery infrastructure map | vic.gov.au (www.vic.gov.au)

Additional information on e-waste disposal and locations can be found at:

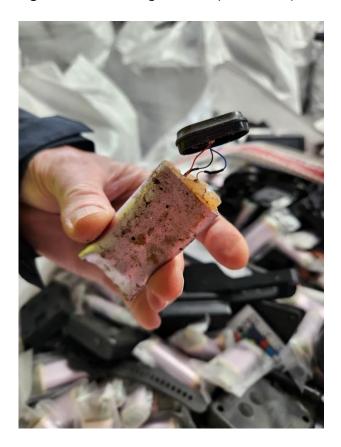

- Business e-waste recycling Business e-waste recyclers | Sustainability Victoria
- Planet Ark also offer drop off points in addition to council services.
   http://recyclingnearyou.com.au/vapes

## What proportion of vaping products are disposed of in the correct way out of the overall product that comes into the state?

Contamination in materials sent for recycling are generally expressed as an overall rate and does not breakdown to individual items such as vapes. EPA Victoria has not been able to source specific reliable data relating to incorrect disposal of vapes.

EPA officers inspect waste facilities and discuss issues such as contamination with facility operators. The photos below taken by EPA officers show some of the contamination found at waste premises. Fig.2 is a good example of the incorrect disposal of vapes at a facility designed to manage organic waste and not e-waste.

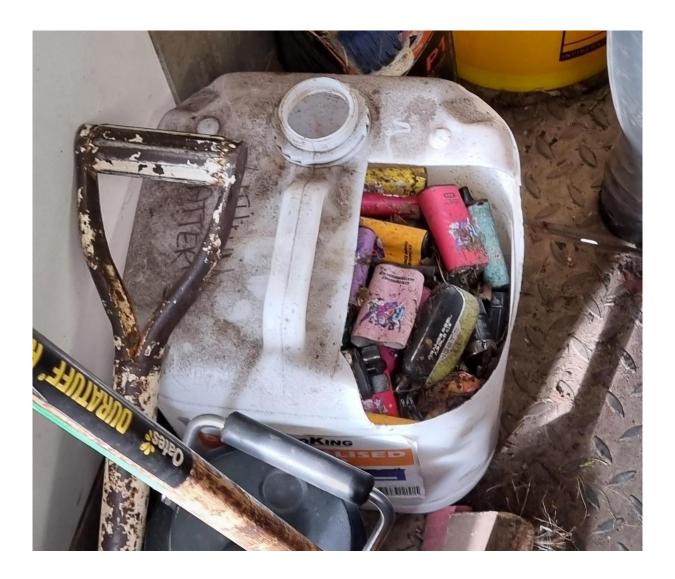

Fig 1. Shows a damaged battery from a vape not separated from standard e-waste processing

**Fig 2**. Is an example of vapes recovered from a composting facility that accepts food organics and garden organics (FOGO) from municipal kerbside collection. The contents of the drum highlight the number of vapes removed from organic waste in just a few weeks

**Table 1** List of transfer stations (facilities known not to accept e-waste have been removed).
