## Introduction – Financial and Performance Outcomes Questionnaire

The Committee’s inquiry into the 2023–24 Financial and Performance Outcomes examines:

- the Government’s actual versus budgeted expenditure and revenue
- the actual versus target performance outcomes at a departmental/agency level
- other expenditure unforeseen at the time of preparing the 2023–24 Budget and outcomes achieved.

The inquiry aims to benefit the Parliament and the community by:

- promoting the accountability, transparency and integrity of the executive and the public sector
- encouraging the effective and efficient delivery of public services and assets.

This questionnaire seeks information on the departmental/agency financials for the 2023–24 financial year, what was achieved during the year and how that compares to expectations.

### **Consistency with the budget papers**

Whenever referring to an initiative/program/project that is in the budget papers, please use the same name as is used in the budget papers. This ensures that the Committee can correlate the information provided by the department with the information in the budget papers.

### **Basis of consolidation**

For departments, please use the same basis of consolidation as was used in the budget papers and in the budget portfolio outcomes statement in the department’s annual report.

## Section A: Output variances and program outcomes

### Question 30 (all departments and entities) Challenges experienced by department/agency

Please list a minimum of three main challenges/risks faced by the department/agency in 2023–24.

A significant challenge may be any matter or strategy that impacted the department/agency, whether it arose externally or internally or as a result of new policy or legislation.

	Challenge experienced	Internal/ External	Causes of the challenge	Action taken to manage the challenge/risk
1.	Increased capital infrastructure costs compared to budgeted capital expenditure in the corporate plan	External	Inflationary pressures	Despite the challenge Barwon Water has managed this through: <ul style="list-style-type: none"> <li>- Regular Capital Program reporting to track project forecast variances to the Price Submission budget allocations and key causes of cost increases.</li> <li>- Capital program prioritisation driven by risk assessments and asset modelling to understand the potential impact of project deferral on key business risks and service levels.</li> <li>- Uplift to project change control practices.</li> </ul>
2.	Customer hardship	External	Inflationary pressures/ Cost of living	Our customer-facing teams proactively reached out to 28,500 customers facing difficulties with bill payments, offering various support options. While we have seen a gradual rise in aged debtors over 60 days, this is partly due to more customers receiving hardship grants and extended payment periods. The value of customer support grants increased by 26%, and the number of customers on support plans grew by 15%.
3.	Enterprise Bargaining Agreement (EBA) Negotiations	Internal	Inflationary pressures/ Cost of living	With the ongoing cost of living pressures impacting the staff at Barwon Water, the urgency in moving the EBA forward was paramount. Coupled with delays in approval to begin bargaining, it has been a challenge to meet agreement in the short term. Despite this challenge, management and staff representatives have held 18 meetings and are edging closer to finalising this agreement. This progress was as a result of the planning and contributions of all stakeholders in the context of wages policy.
4.	Sustained high interest rates	External	Economic pressures	Despite this challenge, the ongoing management of our debt portfolio has minimised the impact of these rises and has supported our ongoing commitment to, and focus on, disciplined capital and cash management throughout the year.
