Submission:

Does the everyday "community" get into this stitch-up to close Power Stations? Seems to be one sided speakers who do not represent most of Latrobe Valley!! Anyone can call her/him a "Voice" of the Valley!! It does not make it so. Many want Coal-fired Power Stations to remain and keep major employment here! Many of our workers have had to go elsewhere to feed their families since Hazelwood was forced to close, and has caused many split-families! Yes this Labor Govt. trebled the royalties on the coal extracted from Hazelwood making it unviable for them to remain for a few more years! Not everything you will be told will be true by this left spin!
