

I would like to make a complaint against putting up these useless road fences as they are dangerous, expensive & a waste of tax payers & \$\$\$\$. I was on my motorcycle, at night & a car that was on the side of the road pulled back on, I went to move out & being night time (in country Victoria..Byrneside) saw the centre road fence just in time to avoid both the car & fence. It seems to most country people that these barriers are being erected on roads where there are very minimal accidents. Everyone I talk to about them agrees that the money would be better spent on making the road surfaces better on country roads. Murchison to Violet Town & Elmore to Goornong are 2 that stand out, as well as many others around the state. Shepparton East to Benalla does not need these barriers. So how about stopping the waste of money & spend it on the surfaces to make it safe for all.

Yours sincerely
Daryle Bell
