Submission:

My daughter has to catch three buses to get to school. We live 10 km from town and choose to send her to a catholic school. As it's not the closest as that was full we have to pay \$110 per term. Two of the busses are connected with the school system but the third is the public system as the school is not registered with the school bus system as it is a new school and this has yet to be approved.

It's a nightmare if my daughter misses a connection with the buses as I'm usually at work so I have to rely on friends to get her to school as the school or bus coordinator takes no responsibility because of the two systems and they do not communicate.

Extended the school bus system in regional areas is essential as we don't have access to other forms of public transport like in city' areas.
