Writing from Moriac 3240. Our children have access to single bus that joins various interchanges to feed to and from multiple schools to our town. The result of this is that often young people are needing to catch 2 - 3 busses minimum and have a total transit time of up to 2 1/2 hours for the return trip to school each day. For reference our children's school is a 13 minute drive from our house. This extremely long commute provides a great deal of disadvantage in regards to personal time, mental health, after school activities and sports, employment and ability to complete homework and assignments.

PTV do not offer services to our town. I would support public use of the school buses if it would ensure additional services were in place to our town and a simpler, more direct and quicker route to and from local schools. Priority would need to be given to students over the general public.
