

To whom this may concern,

I am want to make a inquiry into housing. I am very disappointed in the way housing is so hard to find and yet there is so many way that housing can be fixed,

no matter what no one doesn't deserve to be on the streets and everyone needs a safe place to live and I definitely think that people need to have the freedom to own there home there isn't enough done around homeless it think that there shouldn't be a home buyers deposit to get a home.

And the church's need to be open for the homeless to go to stay and and more funding for more housing organisations and more housing built for the disability and non-profit organisation to help with housing as well but the issues are housing is not affordable the housing market needs to be more affordable.

Please get back to me and follow up the issues I highlighted that need to be addressed.

Kind regards,

Angus
