YOUR SUBMISSION

Submission:

I support and call for the implementation of a national, state and territory based public sex offender register to help protect all Australian children from sexual predators. Parents need all the resources available to keep their children safe. A public sex offender register would also, I believe, act as a deterrent to would be offenders or repeat offenders. Child sexual abuse is on the increase and it is the government's responsibility (federal and state) to do whatever they can to protect all children. The right's of innocent children must always take precedence over the rights of adult offenders.

Are you interested in appearing before the committee in person to talk about your submission?

Yes
