

Greetings.

I feel it important to point out to this committee that your parliaments ongoing drug war is rightly considered a form of civil war and the rights for a person to take up arms in defense against your groups violence has been claimed successfully in two other states and applies equally to the area your parliament refer to as Victoria. Citizens claiming such right are to be considered civilians taking up arms in defense against a hostile military, who have not had the chance to create a formal militia and due all the honor and respect of any military combatant.

We the drug using citizens of this great island ask that you abandon your armed violence against us immediately.

Thank you for your time.

Please feel free to publish my submission and name, but remove my phonenumber, address and any other contact details.

George Dickson.
