**\*\*confidential\*\***,\*\*ill allow the following paragraphs to be used as reference but my name must be kept confidential at all times\*\*

I know people who have been told by nurses, doctors and even a professor to keep smoking cannabis in aid of pain so the use of codeine and endone isnt used.

people who use it to aid in sleep from anxiety & depression problems and also as a wind down from anxiety to avoid heavy prescription reliance.

weed is also great for people who have hard drug addictions and even alcoholism as a way to keep off things that are poisonous to their bodies.

there,s countless studies on weed being used for PTSD, parkisons, cancer, eating problems and the list goes on.

legalization will both create buisness and wealth within the state along with jobs and decrease crime and policing resources required to deal with the illegal trade since weed is illegal. America and Canada are a great role model on how we should go by our legalization of recreational use and personal growing and also licensing for farms, dispensaries, cafes, etc...
