

Dear Sir/Madam,

I have included my submission. Please remove my address from public viewing.

When studied Advanced Diploma of Business Management at BHI, Box Hill Tafe, the staff failed to provide reasonable adjustments in form of light books, chairs and access to specialised Tutors. This formed discrimination.

When studied Advanced Diploma of Business Management at Kangan TAFE, One teacher discriminated and I had to make multiple complaints against this staff. The Kangan Tafe Senior Executive were not happy about my complaints.

Also, I have seen that the current Disability Liaison Officer, breaches the privacy of previous Disability Liaison Officer, who died of sudden sever illness (relieving highly sensitive information).

The current DLO is bully also. Asks questions that are illegal to ask and does not believe on information provided.

No TAFE has the funding or resources to support persons with impairments. Also, person with impairment requires multiple institutions supports in place to succeed in life.

By the government asking this submission to be provided, the government should have funded extensive support services = reasonable adjustments technology to allow these submissions to progress.

The government has discriminatory mentality including many members of the community. The government does not represents interests of people with impairments.

Most people with multiple impairments are not aware of own legal rights and complaints channels. Most people with impairments have own voices not heard.
