

Question no:	28
Question	With regards to the ongoing PPP school contracts, what rate (%) of asset replacement value was factored into the contracts?

Response:

Under a PPP contract, the value of each asset and the maintenance applied to the asset is calculated individually. Across a PPP contract of multiple schools, there are thousands of assets, each with a different replacement value.

There is no aggregated asset replacement value. The replacement value of the assets in the two schools PPP contracts are Commercial-in-Confidence.
