

Dear Ms Blandthorn,

I am writing to you as I believe the proposed No Jab No Play legislation is a breach of human rights.

Specifically, sections 14-17 of the Victorian Charter of human rights and responsibility.

Due to some severe reactions to vaccines in my extended family I have thoroughly researched all vaccines, their ingredients and potential side effects and chosen not to administer all vaccines as per the schedule. I believe that this is my right as a parent, to make an informed choice for my child.

I also believe it is discrimination to not allow my healthy child to attend kindergarten unless the full schedule has been administered.

This proposal needs more consideration and research.
