**Subject:** No jab no pay/play

To whom it May Concern,

I will keep my email short as I'm not a very wordy person.

I'm a mother of two children and I'm very much a person who believes in pro choice when it comes to vaccinating my children and for others vaccinating their children.

I believe that the new laws ( no jab no pay and no play) that the government would like to introduce go against many of the key points of the human rights charter 2006.

No person should be put in a situation where they feel that they must undergo a medical procedure. Many parents I know are feeling forced into this situation due to many different circumstances.

I ask you to provide the proof of vaccines working, of causing no injury.

I ask you of the proof that the vaccinated are healthier than the non vaccinated.

I ask you to prove that the shedding that goes on from vaccines is not a risk to the community.

One of my child was injured by a vaccine, so I became a Conscience Objector. This is something the government are trying to take away from me.

I will not allow my children to become an experiment. I will not be bribed into having my children vaccinated.

I'm concerned for the many that are feeling this pressure, no one should be made to have something invasive like vaccination.

Regards,

Rebecca Luscombe
