2008–09	3.4 per cent
2009–10	3.3 per cent
2010–11	3.9 per cent.

- (3) It is not possible to provide reliable projected attrition rates for the coming four years because attrition is influenced by a number of factors, such as economic trends, and is difficult to predict accurately.

The number of new recruits sworn since 2007–08 is:

2007–08	391
2008–09	414
2009–10	614
2010–11	757.

- (5) It is not possible to provide reliable data for the number of new sworn officers for the coming four years because this will depend on a number of factors that are difficult to predict accurately, such as the number successfully completing the training program and the attrition rate of the existing workforce.

**Ports: MV *Rena* — inspections**

**Water: Dight's Falls — weir replacement and fishway reconstruction**

**8149.** **MR BARBER** — To ask the Minister for Higher Education and Skills (for the Minister for Water): In relation to Melbourne Water's Dight's Falls weir replacement and fishway reconstruction:

- (1) Was the project or parts of the project put to public tender.
- (2) What was the original tender (or initial costing) for the replacement of Dight's Falls weir and associated works including a new fishway.
- (3) How much has the project cost to date.
- (4) How much will the project cost on completion.
- (5) What were the reasons for the design of the project not taking into account the potential for high river flows.

**ANSWER:**

I am informed that:

The Dights Falls project is being delivered by the Waterways Alliance. The Waterways Alliance is a partnership between Melbourne Water, Fulton Hogan, Ecodynamics and SMEC and was set up to deliver a five-year program of works, including the Dight's Falls project. The five-year program of works was publicly tendered in 2008.

The estimated cost for the replacement of Dight's Falls weir and associated works including a new fishway was \$8.2 million. The cost of the project to date is \$5.04 million. The current estimate of the project's cost at completion is around \$8.9 million.

The expected cost overrun is due to higher than expected river levels this year (2011) causing a delay to the completion of works.

The project design considered the previous 35 years of historical river flows. A diversion around the worksite was designed and constructed with a capacity of 1500 ML per day with the expectation that high river levels would exceed this and impact on works on average around one day per month. This year has seen an increase in the higher than 'normal' rainfall events and river levels have consistently exceed the capacity of the diversion since February 2011.

**Public transport: rail — Caroline Springs station**

**8157. MS HARTLAND** — To ask the Minister for Planning (for the Minister for Public Transport): In relation to a new train station at Caroline Springs and the minister's response given 22 March 2011 to an adjournment matter raised by me on 1 March 2011:

  - (a) if so, when was it completed and what was the outcome; and
  - (b) if not, when will the review be completed.
- (3) Is the government's review of the project limited to the timetable of construction, or does it include other aspects, including whether to build the station at all.
- (4) Has any development work including land acquisition, construction of an access road or environmental protection been carried out since 22 March 2011.
- (5) Are there any plans to electrify that section of the railway line.

**ANSWER:**

I am informed that, as at the date the question was raised:

The timetable for the construction of the new railway station remains under review.

The coalition government is planning improvements to existing rail infrastructure in the country and outer areas of Melbourne. 1. On behalf of the Minister for Environment and Climate Change and the Minister for Roads, EPA and VicRoads have consulted, along with the Southern Grampians shire.
2. I am advised that while bitumen does contain chemicals which are potentially dangerous to health and the environment, these potentially dangerous chemicals are bound in a matrix structure and not readily released to the environment. EPA advises that there is no danger to public health, and the impact on the environment is primarily visual. The risk associated with this small quantity of waste material is no different to the thousands of kilometres of bitumen pavement throughout Victoria.
3. EPA advises that this has not occurred.
4. EPA will continue to liaise with VicRoads to ensure the debris is cleaned up.

**ANSWER:**

I am advised that:

Accusations have been made that the Country Fire Authority (CFA) failed to warn staff and families they were exposed to carcinogenic chemicals while working and living at the CFA Fiskville training facility.

These matters are of great concern to me and the CFA has put in place a full investigation of the claims, including engaging a hygienist to prepare a report for CFA on the Fiskville facilities. The hygienist has attended the Fiskville site and has concluded that there is no evidence of any risk to current visitors or users of the CFA training facility at Fiskville.

An investigation and documentation of the history surrounding the operations of the Fiskville site from the 1970s through to 2000, including a review of all environmental assessments and other available information, will also be undertaken.

A key aim of this work will be to determine what, if any, chemicals were at the Fiskville site and may have been used in active burning processes for training needs.

Former EPA Deputy Chairman, Rob Joy, has been engaged to lead this work.

I have asked the CFA to keep me informed of progress in its investigation.

**Roads: Kilmore bypass**

**8190.** **MS BROAD** — To ask the Minister for Planning (for the Minister for Roads): Has there been any directive to VicRoads preventing the examination of options for a bypass to the west of the Kilmore township.

**ANSWER:**

I am informed that, as at the date the question was raised:

There has certainly not been any directive to VicRoads preventing the examination of options for a bypass to the west of Kilmore township.

In fact, in a media release dated 13 December 2011, I announced that the planning investigations will include possible options to the west of Kilmore and that these would be examined in conjunction with options within three corridors to the east of Kilmore.

**8191.** **MS BROAD** — To ask the Minister for Planning (for the Minister for Roads): What endangered species of flora and fauna will be affected in the Monument Hill precinct at Kilmore by options A, B or C for a bypass to the East of Kilmore township.

**ANSWER:**

I am informed that, as at the date the question was raised:

The impact on flora and fauna in the Monument Hill precinct will be known once flora and fauna studies for the eastern option are completed.

**Roads: Kilmore bypass**

**8192.** **MS BROAD** — To ask the Minister for Planning (for the Minister for Roads): How many homes will be compulsorily acquired for options A, B or C for a bypass to the east of Kilmore township.

**ANSWER:**

The number of homes that would need to be acquired for each of the eastern options will be known when design work is sufficiently advanced to determine the footprint of each of the options.

**Roads: Kilmore bypass**

**8194. MS BROAD** — To ask the Minister for Planning (for the Minister for Roads): Will any environmental, cultural, heritage or sporting overlays have to be altered or removed as a result of options A, B or C for a bypass to the east of Kilmore township.

**ANSWER:**

I am informed that, as at the date the question was raised:

The planning investigations for all of the options being investigated will consider all cultural heritage, social, flora and fauna, noise, landscape, and land use matters, including impacts on the Monument Hill reserve, prior to determining a preferred route.

The land use assessment report to be prepared as part of the planning investigations will provide recommendations for each of the options to comply with the provisions of the various overlays.

Any changes that would need to be made to overlays would be sought conjointly with the planning scheme amendment for the preferred alignment.

There are currently no cultural or heritage overlays in areas crossed by the Kilmore Wallan bypass eastern options.

**Roads: Kilmore bypass**

**8195. MS BROAD** — To ask the Minister for Planning (for the Minister for Roads): What are the impacts on safe road access by the CFA to Monument Hill in the event of a bushfire in the area of options A, B or C for a bypass to the east of Kilmore township.

**ANSWER:**

I am informed that, as at the date the question was raised:

The Kilmore Wallan bypass option C (Quinns Road) is the only option that passes near to the Monument Hill reserve.

Option C (Quinns Road) could potentially provide improved access for the CFA and other emergency services response to Monument Hill in the event of a bushfire and improve access for local residents to evacuate from the area.

**8196.** **MS PENNICUIK** — To ask the Minister for Planning (for the Minister for Ports): In relation to Port of Melbourne Corporation notices to mariners no. 120 (T)/11 issued on 25 October 2011, No 117 (T)/11 issued on 28 October 2011 and Nos. 126, 127 and 128 (T)/11 issued on 3 November 2011, which warn of the presence of shoaling in the South Channel:

- (1) What is the cause of the shoaling.
- (2) What hazard does it pose to commercial and recreational vessels.
- (3) What impact has or is the shoaling having on the depth of the South Channel.
- (4) What is being done about it.

**ANSWER:**

I am informed that, as at the date the question was raised:

The shoaling is caused by the naturally occurring build-up of sand in the South Channel from wave, tide and storm events.

The shoaling imposes a constraint on deep draught vessels transiting affected areas of the channel by reducing the depth of water available. Hydrographic survey information has shown the declared depth in sections of the South Channel has been reduced by up to 0.6 metres. There is currently no additional risk to safety as all deep draught vessels are being navigated through areas of the channel that continue to have sufficient under-keel clearance for safe navigation. There is no risk to recreational vessels.

Port of Melbourne Corporation (PoMC) has deployed navigational marker buoys specifically identifying the locations of the shoaled areas. These buoy deployments have been supported by the issue of explanatory notice to mariners.

Following receipt of the recent hydrographic survey information, PoMC identified that a maintenance dredging program would be required. On 17 November 2011 PoMC applied for consent under the Coastal Management Act 1995 to undertake maintenance dredging of South Channel. Regulatory approval was granted by the Department of Sustainability and Environment (DSE) on 16 December 2011. As a result PoMC will commence maintenance dredging in the South Channel in February following completion of the peak summer holiday season. The dredging is expected to be undertaken over a period of approximately six weeks.
