That the Local Land Board, on 2nd June, reversed its former decision and recommended the division of the allotment between them, although Reidy was not present. Notices of Motion and Orders of the Day.

WEDNESDAY, 4TH OCTOBER 1876.

1. MAJOR W. C. SMITH: To call the attention of the Honorable the Premier to the following paragraph in the *Ballarat Courier*:—"We learn upon high analytical authority that the probable cause of scarlet fever and similar epidemics in Melbourne will be found in the Yan Yean water, which, owing to insufficient filtration, contains the germs of disease in the vegetable matter that finds its way into the reservoir. If this be true, it is a very serious matter, and probably applies to Ballarat as well as Melbourne. It would be well if the Ballarat water were subjected to searching analysis, so that if the same disease-engendering germs be found in it, extra pains may be taken in the formation of the filter beds at the Gong Gong. It appears that this important subject has recently engaged the attention of scientific men in England, and it has been discovered that filter-beds of ordinary construction fail in their purpose after a few years' use, and that sponge-iron is about the only effectual filter known. If to our water supply we have to attribute the ravages of a disease that for many months has baffled the best of medical skill and local enquiry as to its origin, it would be well if steps were immediately taken to procure a thoroughly reliable analysis of the water which we drink;" and to ask if steps will be taken to have samples of the water from the Yan Yean and the Ballarat reservoirs analysed.
2. MR. LEVIEN: To call the attention of the Honorable the Postmaster-General to the fact that the whole of the shipping intelligence is not posted at the Geelong office; and to ask if he will instruct that, in future, it shall be.
3. MR. HANNA: To ask the Honorable the Commissioner of Railways when the annual report of the Victorian Railways will be furnished to this House, as provided by law.
4. MR. KERNOT: To ask the Honorable the Premier if the Government has received any further information, by telegram or otherwise, relating to steps being taken in London to establish a Cape mail service to one of the Australian colonies.
5. MR. LEVIEN: To call the attention of the Honorable the Chief Secretary to the costliness of audits under the Local Government Act; and to ask if the Government will take some step to lessen the cost of such audits.
6. MR. WHITEMAN: To call the attention of the Honorable the Minister of Lands to the recent action of the Lands department in relation to the sites occupied by tenants of the Crown on the banks of the Yarra, and to the consequences resulting therefrom; and to ask whether he will appoint a Board to take evidence as to the value of such sites, and as to the action and promises of former Ministers and Permanent Heads of the department, with reference to the said sites and Crown tenants.

8. MAJOR W. C. SMITH : To call the attention of the Honorable the Premier to the following paragraph in the *Ballarat Courier* :—"We learn upon high analytical authority that the probable cause of scarlet fever and similar epidemics in Melbourne will be found in the Yan Yean water, which, owing to insufficient filtration, contains the germs of disease in the vegetable matter that finds its way into the reservoir. If this be true, it is a very serious matter, and probably applies to Ballarat as well as Melbourne. It would be well if the Ballarat water were subjected to searching analysis, so that if the same disease-engendering germs be found in it, extra pains may be taken in the formation of the filter beds at the Gong Gong. It appears that this important subject has recently engaged the attention of scientific men in England, and it has been discovered that filter-beds of ordinary construction fail in their purpose after a few years' use, and that sponge-iron is about the only effectual filter known. If to our water supply we have to attribute the ravages of a disease that for many months has baffled the best of medical skill and local enquiry as to its origin, it would be well if steps were immediately taken to procure a thoroughly reliable analysis of the water which we drink ;" and to ask if steps will be taken to have samples of the water from the Yan Yean and the Ballarat reservoirs analysed.
9. MR. WHITEMAN : To call the attention of the Honorable the Minister of Lands to the recent action of the Lands department in relation to the sites occupied by tenants of the Crown on the banks of the Yarra, and to the consequences resulting therefrom ; and to ask whether he will appoint a Board to take evidence as to the value of such sites, and as to the action and promises of former Ministers and Permanent Heads of the department, with reference to the said sites and Crown tenants.
