List of Tables

Population

1.1 Total Population	2
1.2 Population Density	4
1.3 Persons Who Changed Address Since the 2001 Census	6
1.4 Persons Aged 0 to 4 Years	8
1.5 Persons Aged 5 to 14 Years	10
1.6 Persons Aged 15 to 24 Years	12
1.7 Persons Aged 25 to 64 Years	14
1.8 Persons Aged 65 Years and Over	16
1.9 Median Age	18
1.10 Persons Who Need Assistance	20

Ethnicity

2.1 Indigenous Australians	22
2.2 Persons Born Overseas	24
2.3 Recent Arrivals	26
2.4 Persons Born in the UK and Ireland	28
2.5 Persons Born in Southern and Eastern Europe	30
2.6 Persons Born in Africa	32
2.7 Persons Born in the Middle East	34
2.8 Persons Born in North-East Asia	36
2.9 Persons Born in South East Asia	38
2.10 Persons Born Overseas in Non-English Speaking Countries	40
2.11 Persons Who Speak a Language Other Than English at Home	42
2.12 Persons Who Are Not Fluent in English	44

Religion

3.1 Total Christians	46
3.2 Catholics	48
3.3 Buddhists	50
3.4 Muslims	52
3.5 Persons of No Religion	54

Education

4.1 Persons Attending an Infant, Primary and Secondary School	56
4.2 Persons Attending Private Schools	58
4.3 Persons Attending Tertiary Education	60
4.4 Persons Whose Highest Level of Completed Schooling was Year 10 or Below	62
4.5 Households with an Internet Connection	64
4.6 Households with a Broadband Connection	66
4.7 Persons with Tertiary Qualifications	68
4.8 Persons with Trade Qualifications	70

Labour Force	
5.1 Employed Persons	72
5.2 Unemployed Persons	74
5.3 Unemployed Persons Aged 15-19	76
5.4 Labour Force	78
5.5 Women in the Labour Force	80
5.6 Persons Employed Agriculture, Forestry and Fishing	82
5.7 Persons Employed in Manufacturing	84
5.8 Managers and Professionals	86
5.9 Technicians and Trades Workers	88
5.10 Unpaid Voluntary Work	90
Dwellings	
6.1 Fully Owned Dwellings	92
6.2 Dwellings Being Purchased	94
6.3 Rented Dwellings	96
6.4 Median Monthly Housing Loan Repayment	98
6.5 Median Weekly Rent	100
6.6 Flat, Unit or Apartment Dwellings	102
6.7 Persons Residing in Non-Private Dwellings	104
Income	
7.1 Families with a Weekly Income Below \$650	106
7.2 Families with a Weekly Income Above \$2,000	108
7.3 Median Weekly Family Income	110
Families	
8.1 Couple Families with Dependent Children	112
8.2 Couple Families with No Children	114
8.3 Lone Parent Families with Dependent Children	116
8.4 Lone Person Households	118
8.5 Unpaid Child Care	120
Transport	
9.1 Persons Using Public Transport to Travel to Work	122
9.2 Persons Whose Sole Method of Travel to Work is by Bicycle	124
9.3 Dwellings with Two or more Motor Vehicles	126

Introduction

This paper presents a comprehensive set of tables, for a range of demographic and socio-economic data drawn from the 2006 Census of Population and Housing conducted by the Australian Bureau of Statistics (ABS) on 8 August 2006.

Its purpose is to provide Members of Parliament with a basis for comparing a variety of person, family, household and dwelling characteristics in their own electorate with those of their colleagues. Equivalent Victoria-wide "average" data are also provided, to enable further comparison of Members' seats with the state as a whole.

The format of this publication is basically the presentation of two tables of data for each census characteristic. The first table presents the data alphabetically by electorate, while the second table ranks electorates by their percentage of the characteristic, in descending order from highest to lowest. Each table is described and briefly analysed, noting which State Electoral Districts were distinguished by their ranking among the span of electorates as well as by their variance from the Victorian average.

The Research Service acknowledges our colleagues in the Commonwealth Parliamentary Library for the concept of this paper.

The State Electoral Districts used in this publication are the current boundaries that were applicable at the 2006 election.

Population

Table 1.1 Total Population

The following table presents Victorian electoral districts containing the total population for each electorate counted on census night, 8 August 2006. Population counts used in this publication are based on place of usual residence.

Table 1.1a presents an alphabetical listing of electoral districts, while Table 1.1b ranks districts from highest to lowest by population. The State Electoral District (SED) with the highest population is Narre Warren South (81,272). The SED with the lowest population is Bulleen (46,247). The average SED population is 55,977.

Table 1.2 Population Density

Population density is a measure of the population per square kilometre.

Table 1.2a shows an alphabetical list of the electoral districts and their population density, while Table 1.2b ranks population density in descending order, from the electorate with the highest population per sq. km. to the lowest. The SED with the highest population density is Prahran, with a population of 4,596.7 persons per sq. km.. The SED with the lowest population density is Lowan, with a population of only 1.5 persons per sq. km.. Victoria's population density is 21.4 persons per sq. km..

Table 1.3 Persons Who Changed Address Since the 2001 Census

Table 1.3a presents an alphabetical listing of Victorian electoral districts showing the number of persons aged 5 years and over who changed their address since the previous census, that is, migration into each electorate from elsewhere in Victoria, interstate and/or overseas. The proportions presented in Table 1.3b are calculated as a percentage of the total population and are ranked in descending order from highest to lowest. The SED with the highest proportion of persons who changed address since the 2001 census is Melbourne with 56.6%, and Thomastown with 21.5% has the lowest. The average for Victoria is 34.4%.

This increase in Melbourne is largely due to the accelerated development of high density rental apartment dwellings in inner Melbourne and the concomitant surge in inner city living. Non-metropolitan seats that scored above the Victorian average were predominantly coastal (sea change) electorates, in addition to Ballarat West, Bendigo East and Benambra.

Table 1.3a Internal Migration

Table 1.4 Persons Aged 0 to 4 Years

Table 1.4a shows persons aged from 0 to 4 years by number and the proportion of the total population in each electorate. Table 1.4b ranks the proportions in descending order from highest to lowest. The highest proportions are found in outer metropolitan/growth corridor electorates which attract young families to their affordable housing estates. The lowest proportions are located in inner metropolitan Melbourne seats, and a belt of well established central, eastern and south-eastern suburbs electorates.

Narre Warren South with 9.2% has the highest proportion of persons aged 0 to 4 years, and Prahran has the lowest with only 3.6%. The average for Victoria is 6.2%.

Table 1.5 Persons Aged 5 to 14 Years

These tables show persons aged from 5 to 14 years of age by number and the percentage of the total population in each electorate.

Table 1.5b follows the pattern of Table 1.4b which ranks persons aged 0 to 4 years. Outer metropolitan and non-metropolitan seats rated above the Victorian average. Narre Warren South has the highest proportion, with 18.1%, and Prahran again has the lowest proportion with 4.4%. The average for Victoria is 13.1%.

Table 1.6 Persons Aged 15 to 24 Years

Table 1.6a shows persons aged from 15 to 24 years by number and the proportion of the total population in each electorate. Table 1.6b ranks the proportions in descending order from highest to lowest. The highest proportions of 'youth' occurred in and around electorates in which there were major educational institutions, and the lowest proportions predominated in rural electorates.

The SED with the highest proportion of young people aged 15 to 24 years is Melbourne with 29.7% and the lowest is Nepean with only 9.1%. The average for Victoria is 13.7%.

Table 1.6a Persons Aged 15-24 years

Table 1.7 Persons Aged 25 to 64 Years

These tables present the population of persons aged 25 to 64 years by number and the proportions as a percentage of the total population in each electorate. Table 1.7b ranks the percentages in descending order from highest to lowest.

The SED with the highest proportion of persons aged 25 to 64 years is Albert Park with 67.6% and the lowest is Nepean with 47.7%. The average for Victoria is 53.4%.

Table 1.8 Persons Aged 65 Years and Over

The following table presents electoral districts containing the total population aged 65 years and over for each electorate by number and the proportions for each electorate calculated as a percentage of the total population. Table 1.8b ranks the percentages in descending order from highest to lowest. Electorates which have the highest proportions of persons aged 65 years and over are popular Melbourne bayside retirement areas and established areas with retirement villages, nursing homes etc. Rural electorates tend to rate above the Victorian average for this cohort. The lowest ranking electorates are the ‘young families’ electorates in the metropolitan growth corridor regions. The SED with the highest proportion of persons aged 65 and over is Nepean with 27.7%, well above the 13.7% average for Victoria. The lowest proportion is Narre Warren South with only 5.3%.

Table 1.8a Persons Aged 65 years and over

Table 1.9 Median Age

Table 1.9a presents an alphabetical listing of electoral districts showing the median age for each electorate. Median age is the 'middle' point of the age spectrum, where there are an equal number of persons older and younger. Table 1.9b ranks median age in descending order from highest to lowest.

The State Electoral District (SED) with the highest median age is Nepean with 48, in striking contrast to Melbourne with a median age of 28. The average for Victoria is 37.

Table 1.10 Persons Who Need Assistance

‘Persons who need assistance’ are defined here as needing help or assistance with self-care, mobility or communication because of a disability, long term health condition (lasting six months or more) or old age. Once again, the first table presents the data alphabetically by electorate, while Table 1.10b ranks electorates by the proportion of persons who need assistance as a percentage of the total population, in descending order from highest to lowest.

The State Electoral District (SED) with the highest proportion of persons who need assistance is Thomastown with 7.2%, and the electorate with the lowest is Melbourne with 2.2%. The average for Victoria is 4.2%.

Ethnicity

Table 2.1 Indigenous Australians

Indigenous Australians are defined here as persons who identified themselves on the census form as Aboriginal and/or Torres Strait Islander. The proportions for Indigenous Australians are calculated as a percentage of the total population. The SEDs with the highest population and proportion of Indigenous Australians were all in regional areas: Shepparton 3.3%, Mildura 3.2%, followed by Gippsland East with 2.4% - the only electorates that rated over 2.0%. There were six SEDs that shared the lowest proportion of 0.1%, mainly located in Melbourne's affluent eastern suburbs: Kew, Caulfield, Malvern, Doncaster, Bulleen and Hawthorn. The average for Victoria is 0.6%.

Table 2.2 Persons Born Overseas

Table 2.2a presents an alphabetical list of State Electoral Districts with the number of people in each electorate born overseas and the percentage of persons born overseas as a proportion of the total population in each electorate, while Table 2.2b ranks the percentage of persons born overseas in descending order, from highest to lowest.

The SED with the highest proportion of persons born overseas is Clayton with 52.6%, in sharp contrast to the seats of Swan Hill and Lowan with 5.5%. The average for Victoria is 23.8%.

Table 2.3 Recent Arrivals

Recent arrivals are defined here as persons born overseas arriving in Australia on, or after January 1 2001. The proportions of recent arrivals are calculated as a percentage of the total population. Table 2.3a lists State Electoral Districts alphabetically and presents the number of recent arrivals as well as the percentage of recent arrivals for each electorate as a proportion of the total population. Table 2.3b ranks the proportion of recent arrivals in descending order from highest to lowest. The SED with the highest proportion of overseas born people arriving in Australia on, or after, 1 January 2001 is Melbourne with 19.0% and Rodney has the lowest proportion of 0.4%. The average for Victoria is 4.0%.

Table 2.4 Persons Born in the UK and Ireland

The following tables present an alphabetical listing of Victorian electoral districts showing the number of persons born in the United Kingdom and Ireland, and the proportion as a percentage of the total population. Table 2.4b ranks the proportions of persons born in the UK and Ireland in descending order from highest to lowest.

The SED with the highest proportion of persons born in the UK and Ireland is Mornington with 11.8%, and the lowest is Thomastown with only 1.0%. The average for Victoria is 4.4%.

Table 2.7 Persons Born in the Middle East

The Middle East is defined here as including the countries of Bahrain, Gaza and West Bank, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates and Yemen. The proportions of persons born in the Middle East are calculated as a percentage of the total population.

The SED of Broadmeadows has the highest proportion of persons born in the Middle East, with 17.4%, significantly higher than any other electorate. The vast majority of electorates have less than 2% with Ripon, South-West Coast, Lowan and Gippsland East on 0.0%. The average for Victoria is 1.1%.

Table 2.8 Persons Born in North-East Asia

North-East Asia is defined here as including: China, Hong Kong, Japan, Korea – Democratic People’s Republic of (North), Korea – Republic of (South), Macau, Mongolia and Taiwan. The proportions of persons born in North-East Asia are calculated as a percentage of the total population.

Several of the electorates with the highest proportions of persons born in Northeast Asia are located in affluent eastern suburbs seats such as Doncaster, Mount Waverley, Bulleen, Box Hill and Kew.

The SED with the highest proportion of persons born in North-East Asia is Doncaster with 10.4% and a swag of rural and regional electorates all share the lowest proportion of 0.1%, with Rodney at the very bottom. The average for Victoria is 1.9%.

Table 2.9 Persons Born in South-East Asia

South-East Asia is defined here as including: Burma (Myanmar), Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, and Viet Nam. The proportions of persons born in South-East Asia are calculated as a percentage of the total population.

The top ten seats are all held by the ALP in western, south-eastern and inner metropolitan suburbs, contrasting with the distribution of persons born in North-East Asia described in the previous table. The SED with the largest proportion of persons born in South-East Asia is Derrimut with 19.8%. In marked contrast to the metropolitan seats, many of the regional electorates have significantly lower proportions. Ballarat East, South-West Coast, Swan Hill Rodney, Ripon, Polwarth and Lowan all have the lowest proportion with 0.3% and the average for Victoria is 3.4%.

Table 2.11 Persons Who Speak a Language Other Than English at Home

Persons who speak a language other than English at home are ranked as a percentage of the total population.

The SED with the highest proportion of persons speaking a language other than English at home is Thomastown, with 64.9%, substantially higher than the electorate with the lowest proportion, that of South-West Coast with 1.8%, and the average for Victoria of 20.4%.

Table 2.12 Persons Who Are Not Fluent in English

Persons who are not fluent in English are defined here as persons born overseas who stated on the census form that they either did not speak English or did not speak it well. The proportions of persons who are not fluent in English are calculated as a percentage of the total population.

The SED with the highest proportion of persons who are not fluent in English is Derrimut with 14.4%, while six electorates all had the lowest proportion of 0.1%: Ripon, Polwarth, Bendigo East, South-West Coast, Bendigo West and Lowan. Victoria's average is 3.1%.

Religion

Table 3.1 Total Christians

This section deals with the census questions on religion, which are optional in the census.

The total Christian religion is defined here as including: Anglican, Baptist, Catholic, Churches of Christ, Jehovah's Witness, Lutheran, Orthodox, Pentecostal, Presbyterian, Salvation Army, Uniting Church and Other Christian. Persons of the Christian religion are ranked as a percentage of the total population. The SED with the highest proportion of persons of the Christian faith is Niddrie with 75.5%, in marked contrast to Caulfield which has the lowest proportion of only 31.9%, presumably as a consequence of its significant Jewish population. The average for Victoria is 60.5%.

Table 3.2 Catholics

Table 3.2a shows the population of Catholics by number and the proportion of the total population for each electorate. Table 3.2b ranks the proportions in descending order from highest to lowest.

The SED with the highest proportion of Catholics is Niddrie with 49.0%, in contrast to the electorate of Caulfield which has the lowest proportion of 14.5%. The average for Victoria is 27.5%, that is, 1,355,906 persons. Notably, Lowan which has the second lowest distribution of Catholics has the second highest proportion of Christians as shown in the previous table, indicating a very high proportion of non-Catholic Christians. Swan Hill follows a similar pattern.

Table 3.3 Buddhists

In these tables Buddhists are presented by number and percentage of the total population for each electorate. The distribution of Buddhists in Victoria, is mainly located in Labor held metropolitan seats, with very small proportions located in rural and regional electorates.

The SED with the highest proportion of Buddhists is Lyndhurst, located in Melbourne's south eastern suburbs, with 17.3%, compared to an average of 2.7% for Victoria. Rodney and Lowan both have the lowest proportion of 0.2%.

Table 3.4 Muslims

Table 3.4a shows the population of Muslims by number and the proportion of the total population for each electorate. Table 3.4b ranks the proportions in descending order from highest to lowest.

The distribution of Muslims throughout Victoria, in common with the previous table on Buddhists, is largely metropolitan based, in Labor held seats.

The SED with the highest proportion of Muslims was Broadmeadows with 26.5%, significantly higher than every other electorate and the 2.2% average for Victoria. Mornington, Lowan, Ballarat West, Hastings, Bendigo West, Gippsland East, Ripon and Polwarth all had the lowest proportion of only 0.1%.

Table 3.5 Persons of No Religion

No religion is defined here as including 'No religion no further details (nfd)', 'Agnosticism', 'Atheism', 'Humanism' and 'Rationalism'. Persons of no religion are ranked as a percentage of the total population.

One in five Victorians responded that they followed no religion in the 2006 census.

The SED with the highest proportion of persons of no religion was Monbulk with 33.0%, in contrast to Thomastown with the lowest proportion of 6.4%. The average for Victoria was 20.4%.

Education

Table 4.1 Persons Attending an Infant, Primary or Secondary School

These tables show persons attending infant, primary or secondary school, both government and non-government, by number and the percentage of the total population in each electorate.

The distribution of school attendees was predominant in growth corridor and non-metropolitan electorates. The SED with the highest proportion of its population at school was Narre Warren South with 19.2% and Prahran had the lowest with 5.0%. The average for Victoria was 14.9%.

Table 4.2 Persons Attending Private Schools

Table 4.2a shows the number of private school students at all levels and the percentage as a proportion of total students attending infant, primary or secondary schools for each electorate. Table 4.2b ranks the proportions of private school students in descending order from highest to lowest.

The SED with the highest proportion of persons attending private schools is Caulfield with 70.7% and the lowest is Swan Hill with 20.9%. The average for Victoria is 36.3%.

Table 4.3 Persons Attending Tertiary Education

Tertiary education is defined here as either a TAFE college, CAE or University. Persons attending tertiary education are ranked as a percentage of the total population.

The SED with the highest proportion of persons attending tertiary education is Melbourne with 24.3% and electorates with the lowest are Rodney and Swan Hill with 2.3%. Naturally, electorates with tertiary institutions rated well, and metropolitan electorates tended to have higher proportions of persons attending tertiary education than the majority of rural seats. The average for Victoria is 6.1%.

Table 4.4 Persons Whose Highest Level of Completed Schooling was Year 10 or Below

The following table presents electoral districts containing the population whose highest level of completed schooling was year 10 or below and the proportions for each electorate calculated as a percentage of the total population aged 15 years and over. Table 4.4b ranks the percentages in descending order from highest to lowest.

Rodney with 48.4% is the SED with the highest proportion of persons whose highest level of completed schooling was Year 10 or below, and the SED of Melbourne has the lowest, with 9.6%. The average for Victoria is 31.5%.

Table 4.5 Households with an Internet Connection

Table 4.5a presents an alphabetical list of State Electoral Districts with the number of households in each electorate with an internet connection and the percentage of households with an internet connection in each electorate as a proportion of total households. Table 4.5b ranks the proportions of households with an internet connection in descending order, from highest to lowest.

The SED with the highest proportion of households with an internet connection is Eltham with 75.2%, and the electorate of Thomastown has the lowest proportion, with 43.1%. The average for Victoria is 61.0%.

Table 4.6 Households with a Broadband Connection

Households with a broadband connection are ranked as a proportion of total households.

The SED with the highest proportion of households with a broadband connection is Kew with 57.5%, and the electorate with the lowest proportion is Ripon with 20.5%. The average for Victoria is 40.2%.

Table 4.7 Persons with Tertiary Qualifications

The following tables present an alphabetical listing of Victorian electoral districts showing the number of persons with tertiary qualifications, and the proportion as a percentage of the total population aged 15 years and over. Table 4.7b ranks the proportions of persons with tertiary qualifications in descending order from highest to lowest. Tertiary qualifications are defined here as a diploma, degree or higher.

The SED with the highest proportion of persons with tertiary qualifications is Hawthorn with 51.3%, and the SED with the lowest, is Broadmeadows with 10.3%. The average for Victoria is 24.5%. The seats with the highest proportions of persons with tertiary qualifications are predominantly concentrated in Melbourne's affluent inner and eastern metropolitan electorates.

Table 4.8 Persons with Trade Qualifications

Trade qualifications are defined here as Certificate qualifications of all levels. Persons with trade qualifications are ranked as a percentage of the population aged 15 years and over.

The SED with the highest proportion of persons with trade qualifications is Hastings with 21.9%, and the SED with the lowest proportion, is Melbourne with 6.1%. The average for Victoria is 15.3%. The distribution of persons with a trade qualification was greatest in non-metropolitan and peri-urban seats.

Labour Force

Table 5.1 Employed Persons

These tables present the number of employed persons and their respective employment ratios, that is, the number of employed persons as a percentage of the population aged 15 years and over. Table 5.1b ranks the employment ratios in descending order from highest to lowest.

Many of the highest ratio seats are in growth corridor electorates, indicative of the above average proportions of young families with working parents in these electorates and below average proportions of 'retirement age' residents. The SED with the highest employment ratio is Eltham with 68.2%, in contrast to Broadmeadows with the lowest ratio of 39.0%. The average for Victoria is 57.1%.

Table 5.2 Unemployed Persons

Table 5.2a shows the number of unemployed persons and the unemployment rate for each electorate. Table 5.2b ranks the unemployment rate in descending order from highest to lowest. The unemployment rate is defined as the number of unemployed as a percentage of the labour force.

All of the top ten electorates with the highest unemployment rates are held by the Labor Party, and are characterised by their above average rates of persons born overseas, difficulties with speaking English and lack of qualifications. The SED with the highest unemployment rate is Broadmeadows, with 11.9%, in marked contrast to Eltham which has the lowest rate of 3.2%. The average for Victoria is 5.4%.

Table 5.3 Unemployed Persons Aged 15-19

Like the previous tables, these tables also present unemployment data, but focus on the number of unemployed youth aged 15 to 19, and their respective unemployment rates. The youth unemployment rate is defined as the number of unemployed aged 15-19 years as a percentage of the labour force aged 15-19 years.

The SED with the highest unemployment rate for persons aged 15-19 is Melbourne with 26.1%, in contrast to Mordialloc which has the lowest rate of 9.3%. The average for Victoria is 14.0%.

Table 5.4 Labour Force

The labour force is defined here as the 'economically active' population aged 15 years and over, and consists of the employed and the unemployed. The labour force is ranked by participation rate, that is, the labour force as a percentage of the population aged 15 years and over.

The SED with the highest participation rate is Eltham with 70.4%, and the SED with the lowest, is Broadmeadows with 44.3%. The average for Victoria is 60.4%. The highest ranking electorates are 'young family' electorates characterized by high proportions of persons attending schools (Table 4.1), high proportions of mortgaged dwellings (Table 6.2) and low proportions of persons of retirement age (Table 1.8).

Table 5.5 Women in the Labour Force

Table 5.5a presents an alphabetical list of state electoral districts with the number of women in the labour force in each electorate and the percentage of women in the labour force. Table 5.5b ranks the proportions of women in the labour force in descending order, from highest to lowest.

The SED with the highest proportion of women in the labour force is Brunswick with 49.7%, and the SED with the lowest, is Broadmeadows with 40.2%. The average for Victoria is 46.1%.

Table 5.6 Persons Employed in Agriculture, Forestry & Fishing

These tables present the number of persons employed in agriculture, forestry and fishing and their respective proportions as a percentage of the total employed in each electorate. Table 5.6b ranks the proportions of persons employed in agriculture, forestry and fishing in descending order from highest to lowest.

The SED with the highest proportion of persons employed in agriculture, forestry and fishing is Swan Hill with 26.1%, significantly higher than the state average of 2.8% and the electorates of Pascoe Vale and Forest Hill, both with the lowest proportion of only 0.1%. Needless to say, the top ranking electorates for this attribute were all 'country', and all the metropolitan electorates were below the average for the state.

Table 5.7 Persons Employed in Manufacturing

Table 5.7a shows the number of persons employed in manufacturing and the proportion as a percentage of the total employed in each electorate. Table 5.7b ranks the proportions of persons employed in manufacturing in descending order from highest to lowest.

The SED with the highest proportion of persons employed in manufacturing is Lyndhurst with 27.6%, whereas Melbourne has the lowest, with 4.9%. The average for Victoria is 12.6%.

The highest distribution of persons employed in manufacturing predominated in Melbourne's south-eastern suburbs, western suburbs and northern suburbs electorates, all held by the Labor Party.

Table 5.8 Managers and Professionals

These tables present the number of persons employed as managers and professionals and their respective proportions as a percentage of the total employed in each electorate. Table 5.8b ranks the proportions of persons employed as managers and professionals in descending order from highest to lowest.

There is a pattern of seats in Melbourne's inner and eastern metropolitan area which show above average levels of managers and professionals, and which have also shown above average levels of tertiary education in Table 4.7. The SED with the highest proportion of managers and professionals is Albert Park with 58.0% and Broadmeadows is the lowest with 15.6%. The average for Victoria is 34.2%.

Table 5.9 Technicians and Trades Workers

Like the previous tables, the following tables also focus on a particular occupational group. Table 5.9a presents the number of persons employed as technicians and trades workers and the proportions as a percentage of the total employed in each electorate. Table 5.9b ranks the proportions of persons employed as technicians and trades workers in descending order from highest to lowest.

The SED with the highest proportion of technicians and trades workers is Hastings with 20.8% and the lowest is Hawthorn with 5.7%. The average for Victoria is 14.0%.

Table 5.10 Unpaid Voluntary Work

These tables look at the number of people aged 15 years and over, who spent time doing unpaid voluntary work through an organisation or group in the twelve months prior to census night. They are ranked as a proportion of the total population aged 15 years and over.

Rural and regional electorates predominate for this attribute and reinforce conventional notions about the sense of community in country areas. Many of these electorates also revealed their above average retirement age populations in Table 1.8, indicative perhaps of both a need for volunteers and a population available to volunteer. The SED with the highest proportion of unpaid volunteers is Lowan with 35.7%, and the electorate with the lowest is Thomastown with 6.0%. The average for Victoria is 17.9%.

Table 5.10a Unpaid Volunteers

Dwellings

Table 6.1 Fully Owned Dwellings

The following tables present an alphabetical listing of electoral districts showing the number of fully owned dwellings and the proportion as a percentage of total occupied private dwellings. The SED with the highest proportion of fully owned dwellings is Thomastown with 53.9% and the SED with the lowest is Melbourne with 15.5%. The average for Victoria is 36.2%. Rural and regional electorates rank among the highest proportions of full home ownership in addition to a ring of electorates in the middle suburbs of the Melbourne metropolitan region. In contrast, growth corridor and inner Melbourne electorates had the lowest proportions of fully owned dwellings.

Table 6.1a Fully Owned Dwellings

Table 6.2 Dwellings Being Purchased

Dwellings being purchased are defined here to include dwellings being purchased under a rent/buy scheme. They are ranked as a proportion of total occupied private dwellings.

As you would expect, the top ranking electorates for this attribute are located in Melbourne's outer growth corridor regions, which have experienced massive housing estate development.

The SED with the highest proportion of dwellings under mortgage arrangements is Narre Warren South with 61.1%, significantly higher than Melbourne SED with the lowest proportion of only 17.3%. The average for Victoria is 35.5%.

Table 6.2a Dwellings Being Purchased

Table 6.3 Rented Dwellings

Table 6.3a shows the number of rented dwellings and the proportion as a percentage of total occupied private dwellings. Table 6.3b ranks the proportions of rented dwellings in descending order from highest to lowest.

Inner Melbourne metropolitan electorates rate highly for this attribute, as do electorates serving transient or seasonal constituencies, such as tertiary students or fruit pickers.

The SED with the highest proportion of rented dwellings is Melbourne with 63.8%, and the SED with the lowest proportion is Scoresby, with only 11.1%. The average for Victoria is 24.6%.

Table 6.4 Median Monthly Housing Loan Repayment

The median monthly housing loan repayment is the mid point in the distribution of repayments at which there are an equal number of dwellings with repayments above and below that level.

Brighton and Malvern both have the highest median monthly housing loan repayments of \$2,000 and Swan Hill has the lowest median repayment of \$700. The median monthly housing loan repayment for Victoria is \$1,252.

Table 6.6 Flat, Unit or Apartment Dwellings

The following tables present an alphabetical listing of electoral districts showing the number of flat, unit or apartment dwellings and the proportion as a percentage of total occupied private dwellings. Table 6.6b ranks the proportions of flat, unit or apartment dwellings in descending order from highest to lowest.

The SED with the highest proportion of flats, units or apartments is Prahran with a considerable 64.1% in marked contrast to the electorate of Scoresby with only 1.9%. The average for Victoria is 12.6%.

Table 6.7 Persons Residing in Non-Private Dwellings

‘Non-private dwellings’ are defined here as providing a communal or transitory type of accommodation. They include: hotels, motels, nurses’ and other staff quarters, boarding houses, boarding schools, residential colleges, nursing homes, prisons, religious and charitable institutions, hospitals and other communal dwellings (but excluding self-care units in accommodation for the retired or aged). Persons residing in non-private dwellings are based on place of enumeration, that is, where they were located on census night, and are ranked as a percentage of the total population. The SED with the highest proportion of persons residing in non-private dwellings is Melbourne with 20.6% and the SED with the lowest is Narre Warren South, with only 0.2%. The average for Victoria is 2.5%.

Income

Table 7.1 Families with a Weekly Income Below \$650

The following table presents electoral districts showing the number of families with a gross weekly income below \$650 and the proportions for each electorate calculated as a percentage of total families (excluding families with income not stated). Table 7.1b ranks the percentages in descending order from highest to lowest. A gross weekly income below \$650 equates to a gross annual income below \$33,800. Rural electorates dominate the highest proportions for this attribute, along with Labor held seats in the northern, western and south-eastern suburbs of Melbourne. The SED with the highest proportion of families with a weekly income below \$650 is Broadmeadows with 36.7% and the SED with the lowest is Hawthorn with only 9.7%. The average for Victoria is 21.9%.

Table 7.2 Families with a Weekly Income of \$2,000 or More

Families with a gross weekly income of \$2,000 or more, the equivalent of a gross annual income of \$104,000 or more, are ranked as a percentage of total families (excluding families with income not stated).

The highest proportions of families with a weekly family income of \$2,000 or more, are concentrated in inner Melbourne metropolitan electorates including inner eastern and inner bayside. The SED with the highest proportion of families with a weekly income of \$2,000 or more is Hawthorn with 46.9% in significant contrast to Broadmeadows with the lowest proportion of 6.0%. The average for Victoria is 19.4%.

Table 7.3 Median Weekly Family Income

The median weekly family income is the mid point at which there are an equal number of families with incomes above and below that level.

Electorates with the highest median family income follow the pattern of the previous table, with spatial concentrations in inner Melbourne metropolitan electorates including inner eastern and inner bayside. Rural and regional electorates tend to predominate in the low end of the list, along with Labor held seats in the northern, south-eastern and western suburbs of Melbourne. The SED with the highest median weekly family income is Hawthorn with a median weekly family income of \$2,175. Broadmeadows has the lowest median weekly family income of \$777. The average for Victoria is \$1,170.

Families

Table 8.1 Couple Families with Dependent Children

Couple families with dependent children are defined here as including: couples with children under 15 years with or without other dependent children, couples with dependent students 15-24 with or without other dependent children and couples with children under 15 years and dependent students 15-24 years. They are ranked as a proportion of total families. The SED with the highest proportion of couple families with dependent children is Keilor with 51.8%, in contrast to Melbourne with the lowest proportion of only 21.2%. The average for Victoria is 38.0%. Typically, many of the highest ranking electorates were in the housing estate belt surrounding Greater Metropolitan Melbourne.

Table 8.2 Couple Families with No Children

The following table presents electoral districts showing the number of couple families with no children and the proportions for each electorate calculated as a percentage of total families. Table 8.2b ranks the percentages in descending order from highest to lowest.

Above average concentrations of couple families with no children were represented in inner urban metropolitan Melbourne electorates as well as rural and regional electorates which had earlier indicated above average proportions of retirement age populations (see Table 1.8).

The SED with the highest proportion of couples with no children is Prahran with 56.7% and the lowest is Keilor with only 23.3%. The average for Victoria is 35.9%.

Table 8.3 One Parent Families with Dependent Children

These tables look at the number of one parent families with dependent children and their respective proportions as a percentage of total families. Table 8.3b ranks the proportions of one parent families with dependent children in descending order from highest to lowest.

The SED with the highest proportion of one parent families with dependent children is Cranbourne with 15.2% and the SED with the lowest is Bulleen with only 6.4%. The average for Victoria is 10.2%.

Table 8.5 Unpaid Child Care

This table looks at the number of people aged 15 years and over, who spent time doing unpaid child care in the two weeks prior to census night. They are ranked as a proportion of the total population aged 15 years and over.

The SED with the highest proportion of persons who spent time doing unpaid child care is Narre Warren South with 36.0%, and the electorate with the lowest is Melbourne with 12.0%. The average for Victoria is 26.9%.

Transport

Table 9.1 Persons Using Public Transport to Travel to Work

Persons using public transport to travel to work are ranked as a percentage of total employed persons. More than one mode of public transport may have been used. The SED with the highest proportion of persons using public transport to travel to work is Prahran with 24.9% and the SED's with the lowest are Murray Valley and Rodney with only 0.3%. The average for Victoria is 7.8%.

Inner metropolitan electorates, not surprisingly, have the highest rates of public transport usage to travel to work, whereas rural and regional electorates with fewer public transportation options have the lowest.

Table 9.2 Persons Whose Sole Method of Travel to Work is by Bicycle

Persons whose sole method of travel to work is by bicycle are ranked as a percentage of total employed persons.

The SED with the highest proportion of persons whose sole method of travel to work is by bicycle is Brunswick with 6.5%, and the SED with the lowest is Keilor with 0.1%. The average for Victoria is 1.1%. In accord with conventional wisdom, inner Melbourne metropolitan electorates tended to rank highly, but several rural and regional electorates also ranked above the Victorian average: Murray Valley, Shepparton, Rodney, Benalla and Ballarat West made it into the top twenty.

Table 9.3 Dwellings with Two or More Motor Vehicles

Dwellings with two or more registered motor vehicles, which were owned or used by members of a household, and which were garaged or parked near the occupied private dwelling on census night were ranked as a percentage of total dwellings. Vans and company vehicles kept at home are included, but motor bikes, scooters and tractors are not.

The SED with the highest proportion of dwellings with two or more motor vehicles is Yan Yean with 75.3%, and the SED with the lowest is Melbourne with 19.2%. The average for Victoria is 52.9%. Growth corridor electorates on Melbourne's fringe and rural and regional electorates with limited public transportation options tend to rank highly.

Research Service

This paper has been prepared by the Research Service for use by Members of the Victorian Parliament. The Service prepares briefings and publications for Parliament in response to Members, and in anticipation of the requirements, undertaking research in areas of contemporary concern to the Victorian legislature. While it is intended that all information provided is accurate, it does not represent professional legal opinion.

Research publications present current information as at the time of printing. They should not be considered as complete guides to the particular subject or legislation covered. The views expressed are those of the author(s).
